## 'NATURE IN BALANCE' IS Nature Unspoiled

HUNDREDS OF BUSHELS of your wheat are saved every year by the badger. This valuable prairie animal feeds mainly on the destructive rodents which could reduce Canada's wheat fields to dead stubble if they were allowed to thrive unchecked.

This food-chain that nature has forged has to be kept strong. Reckless killing of one of its main links, the badger, is enough to upset the balance of nature and threaten our farm crops. When you are in the field with a gun, remember the food chains...

when you hunt, hunt wisely. Nature in balance is nature unspoiled. CARLING'S
